A Hybrid Framework for Metaverse Digital Clones, AI Aavatars and Associated AI Apps and LLMs

A hybrid framework for Metaverse digital clones, AI avatars and associated AI apps and large language models (LLMs) will be proposed. LLMs for digital clone and AI avatar learning and human-like responses will be analysed and presented. AI apps for digital clones, AI avatars, games, shopping, banking and socializing in the worlds of the Metaverse will be discussed. Metaverse memory recalling over the time and 3D space across various worlds will also be explored. In addition, the cyber security, survivability, endurability and recovery issues will be examined.
